## **DETAILED ACTION**

### ***Response to Amendment***

1. This action is issued in response to applicant's Amendment A(Paper #7) filed 1/21/03.
2. Claims 2,4,13,20 were cancelled. Claims 1,3,5-12, 14-19 were amended. New claims 21-23 were added.
3. Claims 1,3,5-12,14-19, 21-23 are pending.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1,3,5-12,14-19,21-23 are rejected under 35 USC 103(a) as unpatentable over Chaum(US Pat. No: 6,434,238) in view of Dorf(US Pat. No: 6,000,608) and further in view of Kenna(US Pat. No: 6,108,641).
6. As per claims 1,3,5-12,14-19, 21-23 Chaum teaches a stored value card system which comprises a card issuing institution(Abstract)(Fig 1/101) and a point of sale retail establishment(Fig 1/104). Chaum also teaches the card being useable for purchases(col 5 lines 10-40). Dorf teaches a card identifier associated with each card and assigned by the issuing institution(col 4 line 36-col 5 line 14).Dorf teaches a reloadable smart card(col 5 lines 66-67).

Art Unit: 3624

Dorf further teaches an intelligent(smart) card(col 10 lines 49-64) which can be used as an online debit card with a sponsor bank(Fig 1/102) which can be used to transfer funds for any purpose including money orders. Dorf further teaches the use of loyalty cards which are not redeemable for cash(col 9 line 33-col 10 line 6).Dorf also teaches the card identifier being encoded on a magnetic strip(col 4 lines 36-46) and a (POS) reader terminal for the card(col 4 line 25-35) and which accept the card for transactions(col 4 lines 46-67) and engaging a sponsor bank with a master account through the central processor and the banking network which permits a merchant to add value(refunds) and loyalty points to a subaccount card(col 5 lines 4-14). Kenna teaches an integrated nested account financial system with subaccounts including those for investments which may deliver negotiable instruments(retirement accounts,financial accounts) to the subaccount holder(Abstract)(Fig 1/20/30/140)(Fig 2)(Fig 3)(Fig 5)(Fig 9A)(Fig 9B)(Fig 9C)(col 4 line 63-col 5 line 18)(col 8 line 35-43) and Atkins teaches reporting,managing and monitoring financial invdestments in an array of accounts(subaccounts) within a client asccount(Abstract)(Fig 1)(Fig 3-14)(col 3 line 6-col 5 line 59). It would have been obvious to one skilled in the art at the time of the invention to combine Chaum in view of Dorf to teach the above. The motivation to combine is to teach a multifunction card system composed of a gift certificate card, a prepaid phoine card, a loyalty card and a medical information card as enunciated by Dorf(col 3 lines 9-64).It also would have been obvious to one skilled in the art at the time of the invention to combine Chaum in view of Dorf in view of Kenna to teach part of the above. The motivation to combine is to teach an improved brokerage/cash managment system

Art Unit: 3624

and to create a single composite accounts for all funds incorporate in subaccounts as enunciated by Kenna(col 3 lines 31-42).

***Conclusion***

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action.
